

TURBO WRAPPER

USER MANUAL

INSTRUCTIONS

- ① Adjust the height
- ② Adjust the inner diameter
- ③ Adjust the depth
- ④ Adjust the paper height
- ⑤ Adjust the paper width

INSTRUCTIONS

Thank you for choosing Technotape's TURBO wrapper! Please be informed that the settings of the TURBO wrapper are perfectly aligned with Technotape's 11 and 15oz mugs. You do not need to adjust any settings if you are using our mugs.

1 ADJUST THE HEIGHT

This height support allows you to position the mug relative to the wrapper arms. When the mug is placed too high, the wrapper arms will not easily wrap around the mug. However, when the mug is placed too low, the wrapper arms will not fall back. You set the correct height by loosening the allen bolt with the allen wrench and by tightening it again at the correct height.

2 ADJUST THE INNER DIAMETER

This springloaded clamp takes care of the inner diameter. Turn the allen bolt up or down to make sure that it fits the mug's inner diameter.

3 ADJUST THE DEPTH

This height support allows you to position the mug relative to the wrapper arms. When the mug is placed too high, the wrapper arms will not easily wrap around the mug. However, when the mug is placed too low, the wrapper arms will not fall back. You set the correct height by loosening the allen bolt with the allen wrench and by tightening it again at the correct height.

4 ADJUST THE PAPER HEIGHT

If you need to change the positioning of the paper, move the brass pins. Change the brass pins as noted at number 4 to change the height of the paper.

5 ADJUST THE PAPER WIDTH

If you need to change the positioning of the paper, move the brass pins. Change the brass pins as noted at number 5 to change the width of the paper.

TESTING

Test if the settings of the TURBO wrapper are correct by placing a mug in the mug support and then lift the lever as if you were going to wrap the mug. If the wrapper arms automatically fall down, then your TURBO wrapper is correctly set.

IMPORTANT

Positioning

The table where the TURBO wrapper is attached to should be 1 meter high. This height ensures an correct ergonomic posture.

WARNING

Do not adjust any settings other than the settings mentioned under "Instructions", otherwise it will negatively affect the product endresult.

ACCESSOIRES

TURBO wrap

Silicone Wrap

The TURBO wrap is easily placed in the arms of the TURBO wrapper. The stainless steel bars will automatically align due to its clever design. This easy to use silicone wrap is essential to the TURBO wrapper.
